

I've Been Trying To Get It Right.
Been Studying All Night.
Can't Do It In My Head.
Can I Calculate Instead?
My Teacher Said...

You Gotta Show Me All The Steps,
So I Can Geive It A Check.
To Find Where You Went Wrong.
Listen To My Song.
And Sing Along.

*First You Must Divide,
Then You Multiple & Subtract.
Then, You Bring It Down,
The Last Thing That You Do Is:
Check!*

If there are numbers left,
You must repeat the steps.
Until there's nothing left,
You found the quotient,
If there's a number,
Smaller than the Divisor,
Put it behind the quotient,
We'll call it the remainder.

*First You Must Divide,
Then You Multiple & Subtract.
Then, You Bring It Down,
The Last Thing That You Do Is:
Check!*
